

## CORPORATE OVERVIEW

Ahtna Diversified Holdings, LLC (ADH) is a holding company for seven subsidiaries within the Ahtna, Inc., (AI) Family of Companies. AI is an ANC and ADH has ANC 8(a) and Small Disadvantaged Business contracting capabilities. The common management of these subsidiaries is in accordance with SBA guidelines and associated federal regulations (48 CFR 15.305 – Proposal Evaluation).

Ahtna has more than 400 staff in 14 strategic offices throughout the US. Ahtna specializes in program/project management, construction, professional services, advanced technology, and environmental services from initial site investigations through remediation and site closure on military installations.

We support single projects and task orders under IDIQ contracts throughout CONUS and OCONUS locations for multiple DoD and federal clients. In the previous 14 years, Ahtna has managed 48 SATOC/MATOC IDIQ programs, successfully managing 575 TOs valued at \$359 million dollars.

## PFAS PROGRAM HIGHLIGHTS

Ahtna is currently leading PFAS Remediation Investigations (RIs) at several military installations and recently conducted a wastewater treatability study that resulted in cost-saving solutions for the USAF.

Ahtna has implemented innovative technologies for groundwater extraction and treatment systems using novel ion exchange regenerable resin technology. Ahtna has used these treatment technologies to prevent further impacts to drinking water from groundwater impacted by PFAS.

With over 250 multi-disciplinary professionals including scientists, engineers, construction management, field craft, procurement, project controls, QA/QC, GIS, data management, property transfer and records management personnel with decades of experience we are able to gear up a quickly and effectively.

Ahtna's ability to deliver nationwide best in class emerging contaminate results stems from our knack in building strong relationships. We evaluate the expertise necessary to accomplish our clients' missions, goals, and objectives. We then identify astute, knowledgeable, and skilled professionals to form a team with complementary talents. This has proven successful in our JV relationships with Arcadis, Geosyntec, and Baywest partners.

## KEY SERVICES

### Environmental Services

- Engineering evaluation/cost analysis
- Environmental compliance
- Hazardous and toxic waste remediation
- Long-term monitoring
- Permitting
- RCRA and CERCLA Site Closures
- Pilot and treatability studies
- Preliminary assessments, remedial investigations, feasibility studies, and remediation/site restoration
- RCRA Part B permit closures

### Data Collection, Management, and Evaluation

- Client-specific data deliverables (ERPIMS, SEDD, FUDSChem)
- Conceptual site model
- Contaminant fate and transport
- Data validation
- EQuIS data management software
- Historical records
- Interviews
- Internal data management professionals
- Nature and Extent of Contamination
- Site visits
- Threatened & Endangered Species impacts

### Professional Services

- Community relations
- Document control
- Operations and maintenance
- Project plans and reports development
- Records management
- Regulatory compliance

### TEAM STRENGTHS

- ANC-owned with SBA 8(a) Small Disadvantaged Business with the ability for non-protestable direct award of up to \$100M for DoD clients resulting in an expedited timeline
- Excellent safety record – EMR of 0.70, well below the industry average
